

Suhba 2018

Company Profile

AO Suhba is a Russian company with a multipurpose business model. We have branch offices in Kazakhstan, Azerbaijan, Turkey, Bulgaria, UAE, China and Liechtenstein. Our core business line is the development of IT products. Currently the company is at its "Startup B" development stage, attracting investments. In 2017 the international assessment of the market value of Suhba's software projects was 418 billion rubles (\$7.4 billion). Business registration certificate No 1177746536076 dated 30.05.2017, issued by Moscow Inspection Office No 3 of the Federal Tax

Our History

In Arabic suhba means "community" or "friendship". The main ideology of Suhba is uniting people of different religions, ethnicities and cultures. It wasn't by chance that an Arabic word appeared in a Russian company's name, and one of the reasons for that is that the main values, in many ways lost in the West, – such as family, spiritual practices, selfless service to humanity and faith, – are to full extent preserved in the East.

The concept of this company has united a group of enthusiasts whose work very soon began to pay off. The founder of the company and the visionary behind it is the President of AO (JSC) Suhba T. R. Tukhtarov. The key feature of Suhba as an Internet resource is censorship by filtering out legally prohibited or unwarranted information, according to international law or domestic legislation of certain states, from the entire bulk of audio, video, photo and text content.

Our Mission

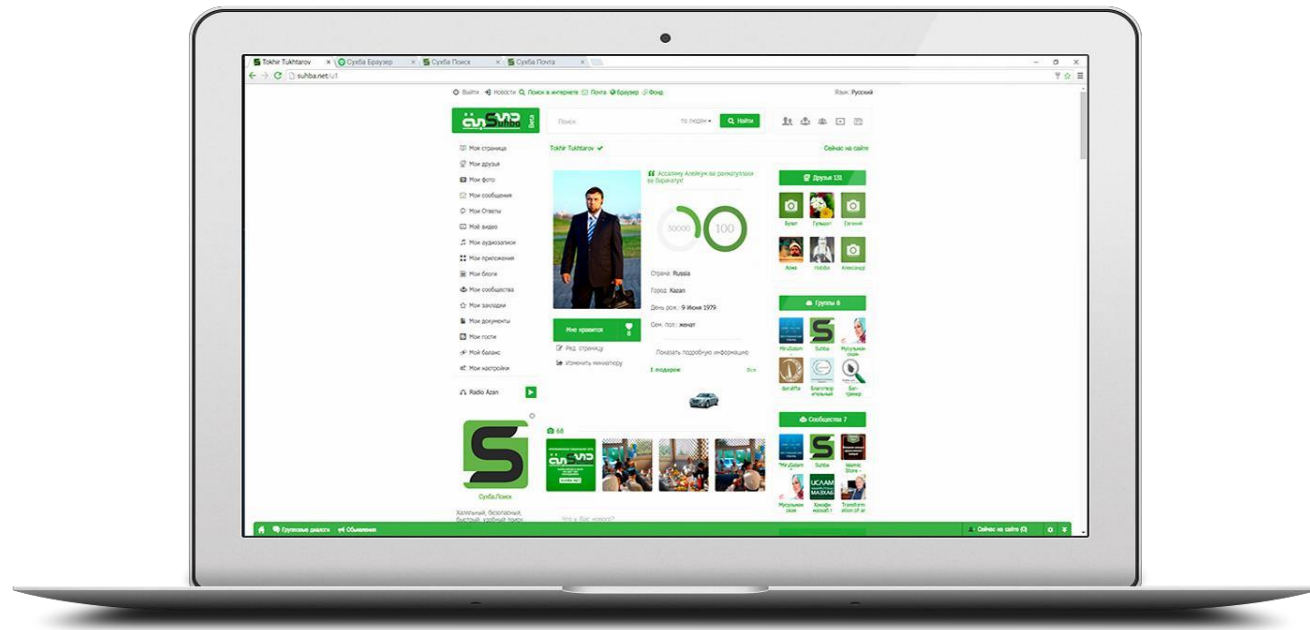

Cultivation of true human values, protection against violence, terrorism and Internet pornography, freedom of communication between people and nations united by the idea of peace and good will on the basis of the halal and kosher principles.

Our Goals

Overcoming political, cultural and language barriers, opening up the world of universal human values via the Internet. Creation of a "green" Internet space for communication, work, education and parenting children. Creation of a positive information environment that would help to form a healthy mindset for the present and future generations; improvement of the users' well-being by way of direct monetization. Opening our own data center and our own independent platform to ensure continuous work and protection of intellectual property.

Our Projects

The **Suhba social network** is a global innovative multilingual international and inter-confessional social network that serves as a platform for a variety of Internet services for the people of today. This social network unites people of diverse ethnicities and nations using unified principles of such moral values as peace and good will.

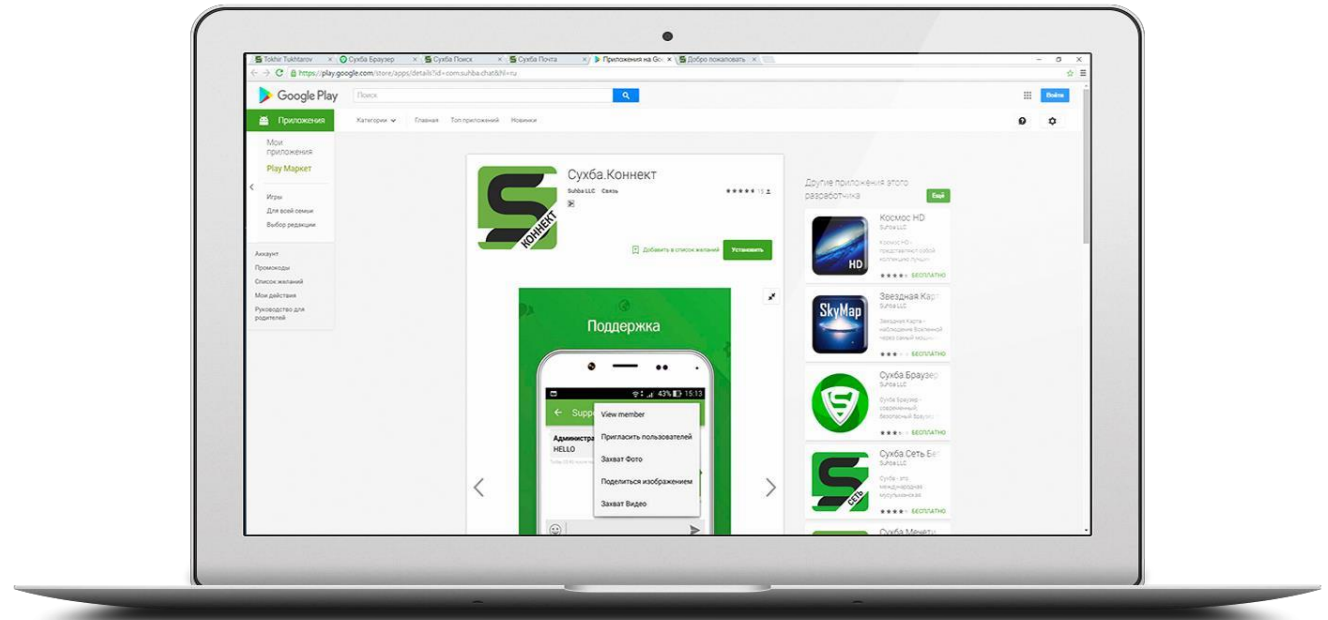

Our Projects

The **Suhba Desktop Browser** is an advanced, fast and safe web browser for desktop PCs. It is based on the latest version of the Blink render engine and the Chromium browser interface. The Suhba Browser supports all the latest web technologies and in addition to that possesses certain unique properties.

Our Projects

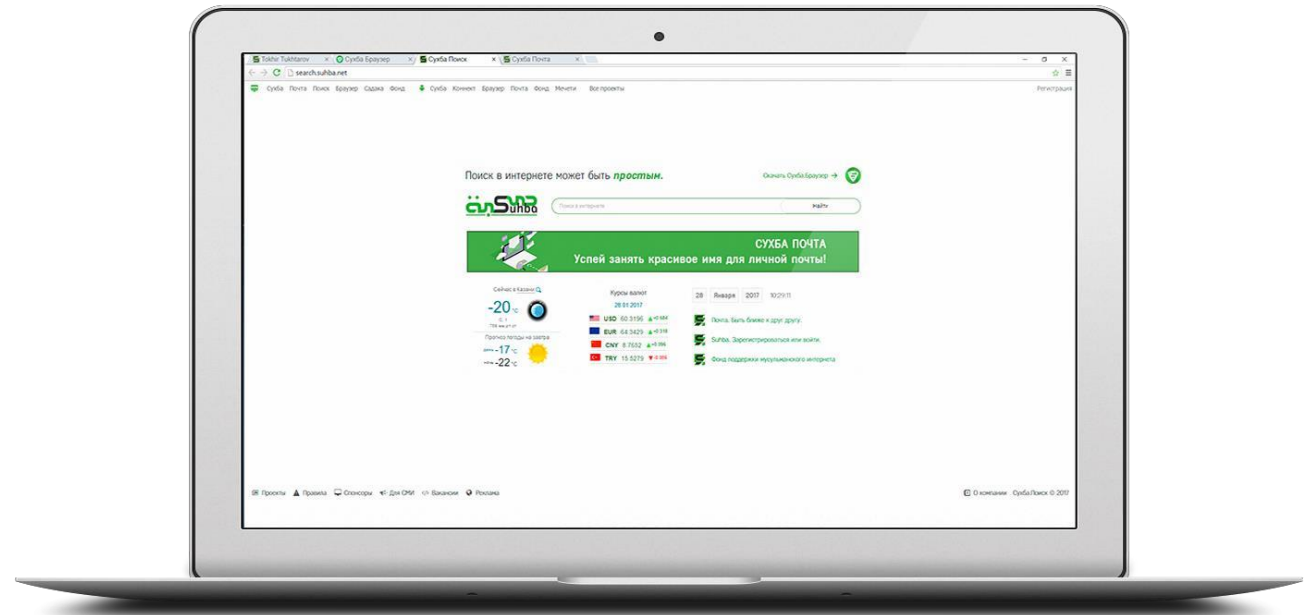

The **Suhba Android Browser** is an advanced, fast and safe mobile web browser based on Suhba's own interface inventions. This browser supports all the latest technologies and has several unique features as well.

Our Projects

Suhba Search is a new search engine with a stylish minimalist design that only shows safe content.

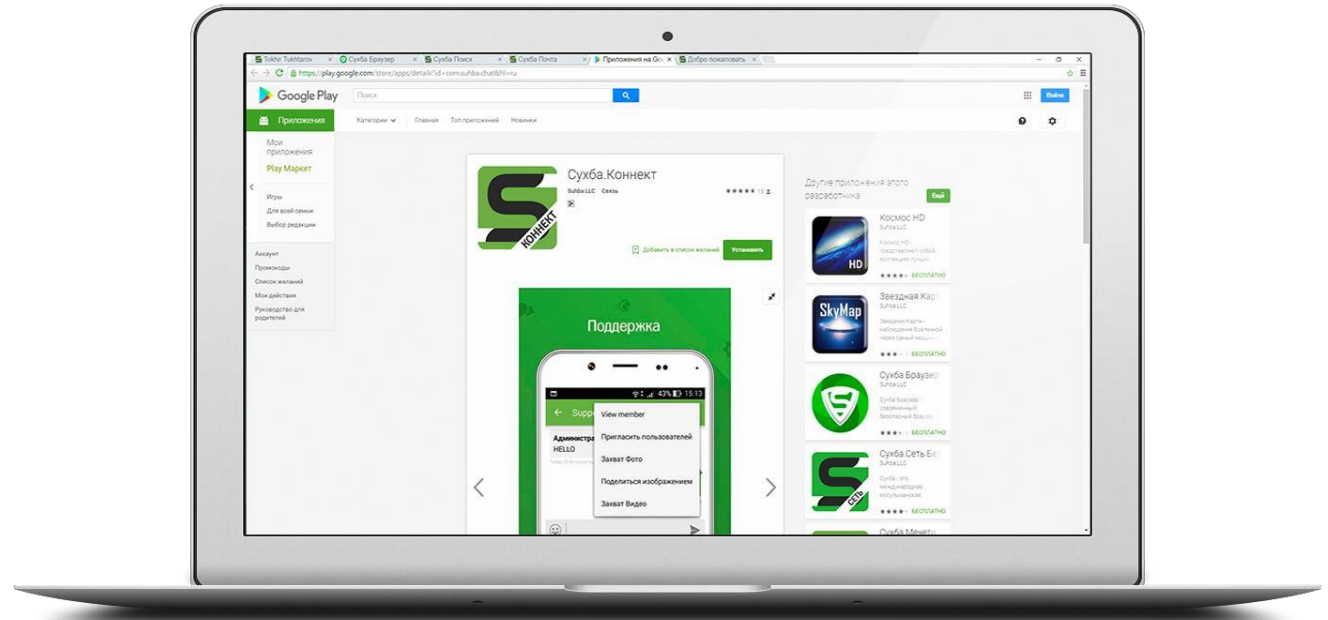

The system of filters installed in Suhba Search enables you to find answers to any questions, as well as any needed websites, pictures, news or products in a matter of seconds without having to worry about moral security. This feature is also integrated with all other Suhba projects

Our Projects

Suhba Connect is a free messenger that uses an Internet connection to enable worldwide communication by audio and video calls and text messages.

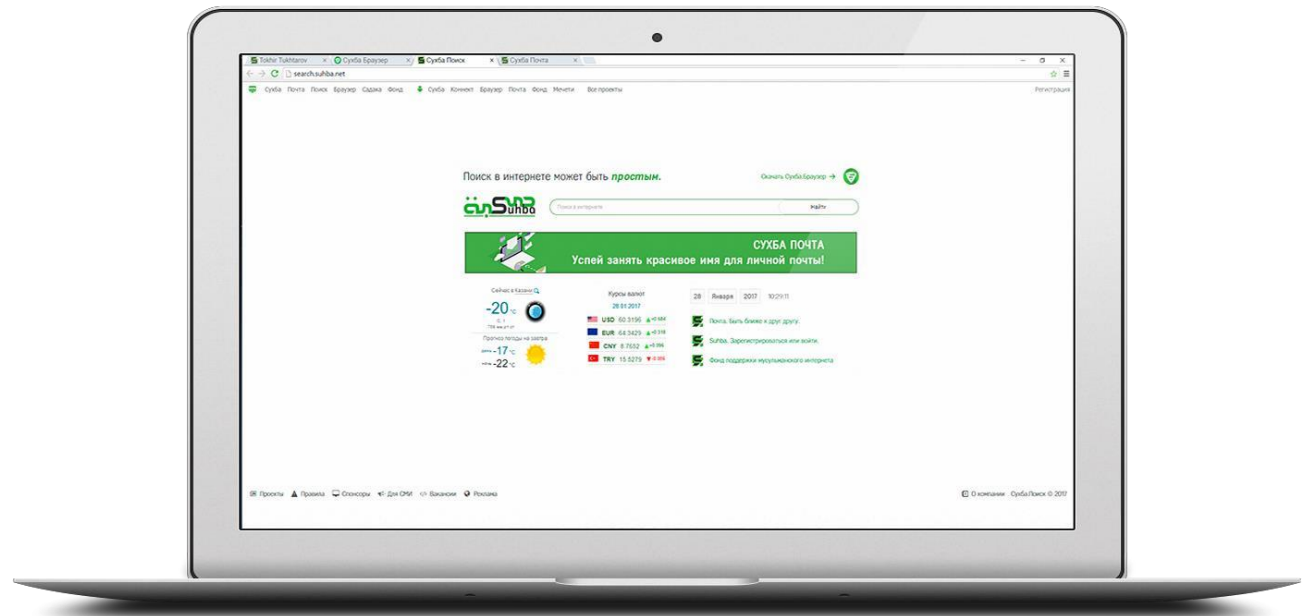

Has an extended functionality compared to other popular messengers

Our Projects

Suhba Mail is our own mailing service that provides an email account for each Suhba social network user on the basis of two domains: @suhba.ru and @suhba.net, for example: name@suhba.net.

The service does not have an advertising module in its core, is easy to use and at the same time highly functional.

The Company's Development Plan

- AO (JSC) Suhba was registered in May of 2017.
